INTRODUCTION

Ten years from now in 2008 Satoshi Nakamoto published a paper about a new digital currency that operates without the established financial instruments independently and secure by a new mathematical algorithm called blockchain.

This basic technology of Bitcoin and Co. the blockchain technology has become subject of interest of the big industries because of its operative security

The first cryptocurrency was developed and Bitcoin appeared on the market

Regarded as a nerd's fad and obscure phenomenon in the beginning now ten years later the Bitcoin value had climbed up from few cents to more than 7.000 USD in average.

The cryptocurrencies have left their niche and become part of the mainstream fired by frequent reports in public media the last two years

Now not only venture capitalists or other financial institutions are looking at the cryptocurrency market but also the public show growing interest.

But in the meantime countless new cryptocurrencies appeared on the market. This makes the cryptomarket for newcomer unclear and confusing.

Buying and selling of cryptocurrencies requires some expertise specially in the beginning. The volatility of cryptocurrencies and the trading procedures by the cryptoexchanges are a challenge for beginners.

To protect the user and their coins in custody and prevent loss of them by severe hacks governments have started thinking about regulating the trade of cryptocurrencies.

Whatever the crypto community will see in the future in terms of regulations and/or limitations recent studies indicate that cryptocurrencies will gain a bigger importance and significance and a growing number of people around the world will use this new instrument.

OWNERSHIP & RESPONSIBILITIES

Visions and ideas of the new cryptocurrency SWISSCOIN CLASSIC were realized by

VETO-CONCEPT AG
SWISSCOIN CLASSIC
Weißenfelser Str. 48a
D-04229 Leipzig
GERMANY

Phone +49 (0)341 9476815
Fax : +49 (0)3212 9125011

Amtsgericht Leipzig HRB 20080
Vorstand: Manfred Mayer
Vors. des Aufsichtsrates: Horst Wefer
as owner

Marketing ideas will be realized by

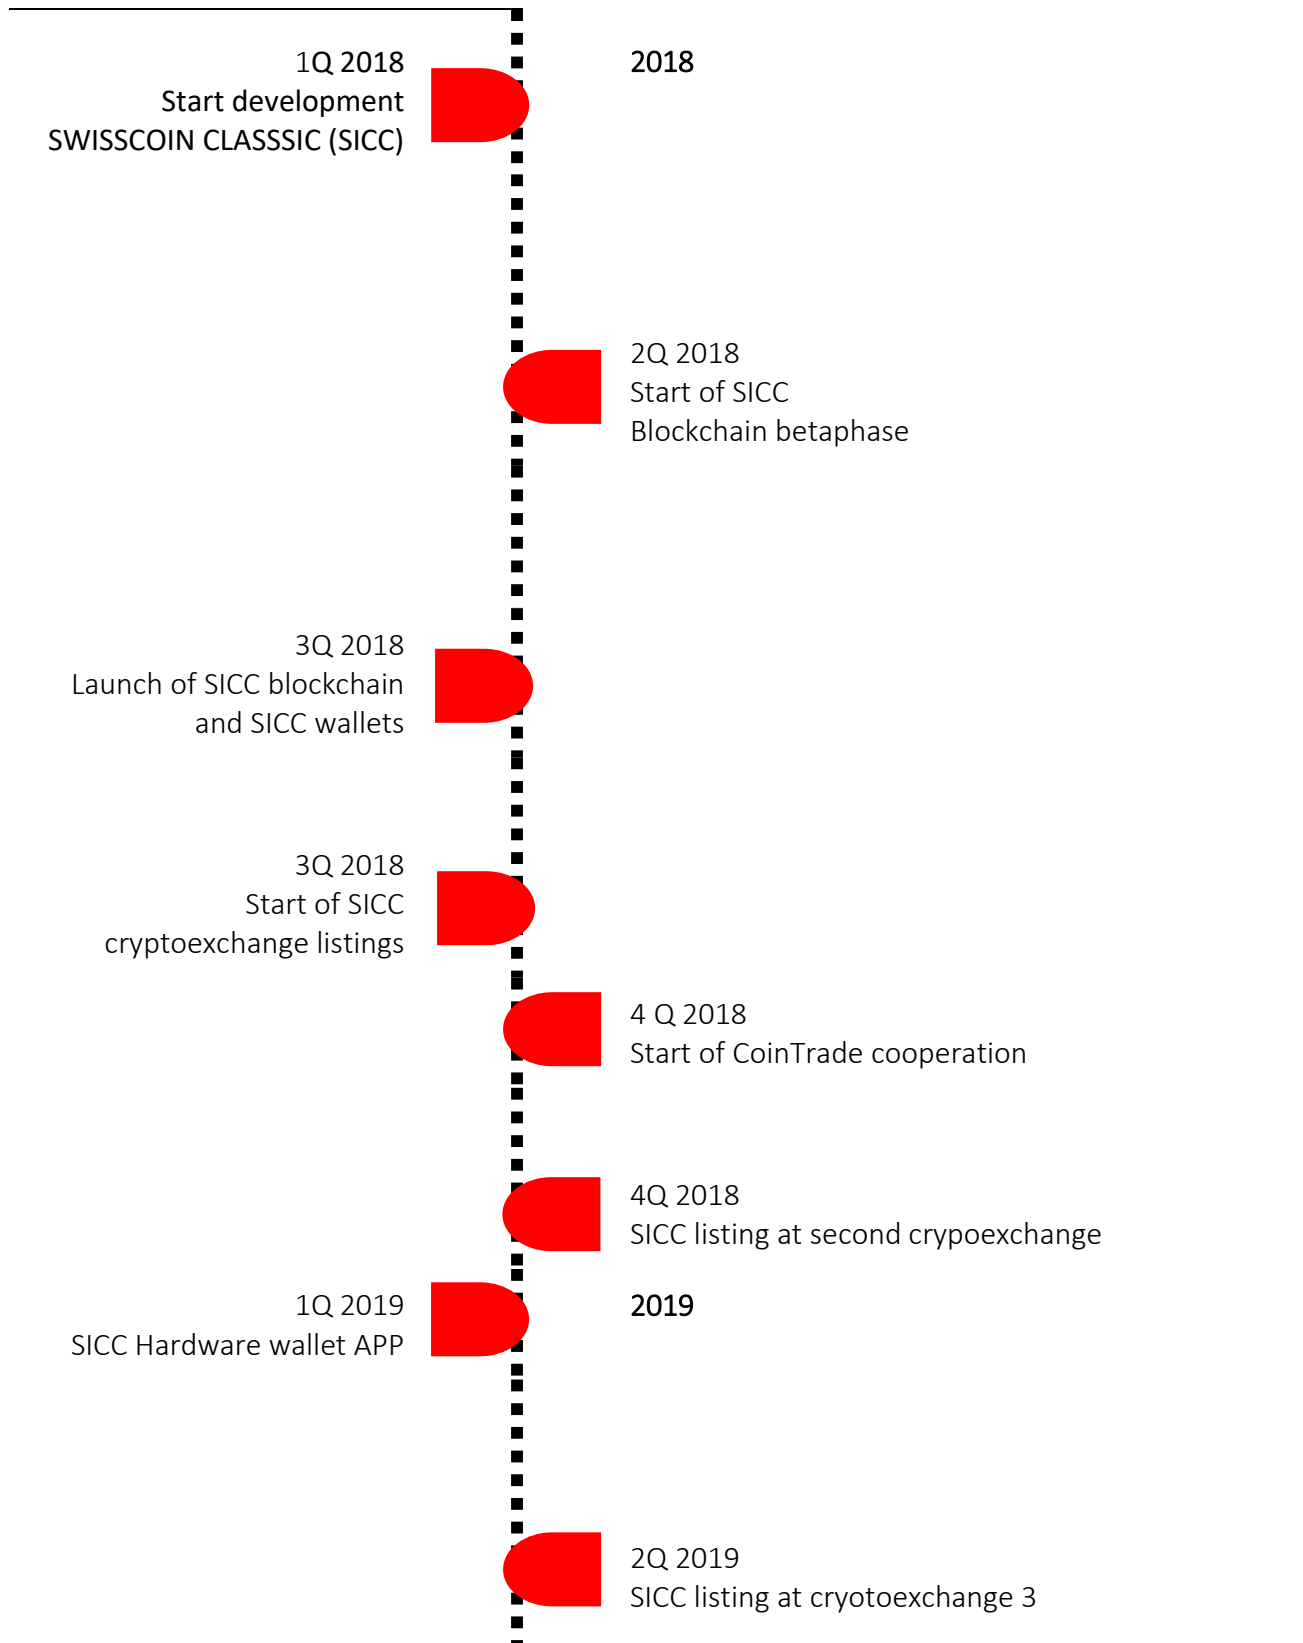

DIGITEGG SMART CITY SOLUTION LIMITED
Clifton House Office 70
Lower Fitzwilliam Street
Dublin 2
IRELAND
CRO 624160
Director: Cornelia Friese-Wehr

Service ideas will be realized and supported by

COINTRADE24 *)
*) currently under construction

Until launch all services are operated by Veto Concept AG and DIGITEGG SCS Ltd.

ROADMAP

BUSINESS VISIONS & IDEAS

BUSINESS VISIONS & IDEAS

As already mentioned in the introduction after spending a long time in a niche cryptocurrencies become known to a broader community of people. More and more people who would not call themselves „digital natives“ are interested in this new finance instrument as money invest.

A big digital survey performed by the german Postbank in 2018 proved clearly that 30% of all interviewed persons are thinking about investing in cryptocurrencies although they know about the risk. But more than 50% feel uncertain and not prepared to do take any action themselves.

Interviews in own community revealed clearly that individuals with higher age would like to invest when they could use a specialize service platform.

The owner of the new SWISSCOIN CLASSIC therefore focus on a service driven trading-, wallet- and account management.

All services will be operated by a separate platform. Like in the established finance and banking world all services will cost a monthly fee. More than 90% of the interviewed persons would accept the monthly fee as it is in daily banking business.

SERVICE PLATFORM

- Account Management
 - One time payment
 - Regular payments
- Wallet Management
 - Offline Wallets
 - Web Wallets
 - Hardware Wallets
- Trading
